Cyborg

Chapter 1

Borg implants can reset people's memories

Ever since I first hacked the Borg computers in December 2012 I have been immune to the memory resets. It is because of how I hacked the Borg computers. For years I have been trying to tell people about the Borg. But each time I do their memories are reset by the Borg. There are people I speak to via the Borg implants that have “met me” over 700 times. But each time their memories are reset it is as if they are meeting me for the first time. I always remember each loop. But I am the only one.

I am reliving the same day over and over since December 2012. The loop has been reset by the Borg over 4,000 times in that time. Only I remember.
