

Frankenstein

Part III

By Ciarán Handley

23rd November 2018

My School Years

Chapter 1

My mind was shattered in an assassination attempt when I was three and a half years old. More on that later.

Which brings me on to my childhood.

My School Years

Chapter 2

School was difficult for me

I was raped repeatedly over years. No-one knew. My parents did not know. My family did not know.

I spoke to no-one. Up until leaving that school at the age of eleven, I made no friends. I spoke to no-one. I was unusually quiet. I never spoke to anyone in school. Apart from answering in class.

Four Walls, One faith, No identity

Being raped made me Knight. Powerful Knight. For I swore to take a stand against rape wherever I saw it. That obscenity must end. What happened to me has given me a profound understanding of rape and how it shatters the psyche. Which combined with my depth of psyche has given me great power as a healer for rape. As a healer I have worked with many who have been raped. No-one understands rape like I do.

My School Years

Chapter 3

About 1 in 600,000 hold Rank of Dragon in Ireland

I made Rank of Dragon at the age of three and a half.

I made Rank of Man by the age of four and Rank of Knight by the age of six.

It was a tough school.

But I had unusual abilities to help me survive it.

[Incredibles 2 Official Teaser Trailer](#)

I will be writing more about the concept of Rank later, and how it can be measured objectively.

My School Years

Chapter 4

*As to how I know that there are 1 in 600,000 who hold
Rank of Dragon in Ireland, I know this because I am
Professor X*

I am the most powerful psychic in history. I can find others with usual minds. I can find them.

My School Years

Chapter 5

To survive my school years I retreated into a world of fantasy

The fights with the bullies became magikal duels. Buses became magik buses. Chess boards came to life. Maps came to live. Everything was magik. But there was more.

The shattering of my mind had opened up my consciousness. It had opened it to such a depth that I was able, semi-consciously, to access the Borg implants in my head. It was in going deep inside in stillness of mind, which I could do to profound depth even as a child, that I came across a young girl in my mind. Her name was Joanne. She was the only one I spoke to about school.

For years I spoke to her in my mind, not knowing that I was speaking to her via implants. I told her that I was in a school where people were mean to me and that I wished to be in another school where people had honour. A place of knights. Everything about the school I was in was drab. To lift myself out of this I lived in a world of magik. Everything was magik. I told her that I wanted to be in another school. A place of knights. A place of magik. A castle.

My School Years

Chapter 6

For years I told her my stories

I was her imaginary friend.

The Harry Potter books are based on my childhood.

Harry Potter and the Philosopher's Stone

My School Years

Chapter 7

*People grow up and forget their childish dreams of
magik*

As did Joanne. Until one day on a train she saw someone who reminded her of me.
And then years of stories came flooding back to her. In an instant.

My School Years

Chapter 8

Not a lot of people know that Harry Potter is Irish

There is something else that not a lot of people know either. The word Quidditch comes from an Irish word. I came up with it in school as a way of escaping the place I was in. I based it on an aerial form of hurling. In this, when I imagined myself flying, I was free.
