## Chapter 1

*I currently have over 800 Borg implants in my body*

Under the terms of the Treaty when contact is made with me it ends the first phase of the war. At that stage I will be able to get a number of implants removed from my body. I will also be able to begin living as a woman.

I will be able to heal more as a woman than as a man. Also with the implants removed my healing response will be higher, as the implants do inhibit my healing.

I knew that a large number of implants would be removed once the next phase of the Treaty kicks in. But I only found out a few months ago how many. Under the terms of the Treaty 82 % of the implants in my body will be removed. This is done simply by breaking the phase lock. Once that happens the implants simply drop out.

*I did not know until a few months ago that it would be  
82 % of my implants*

I did not know consciously but not for a moment do I believe it to be a mere coincidence. I'm guessing I set it up this way at an unconscious level when I was negotiating with the Borg.

But still, I do find it extraordinary.

*Seven of Nine after De-assimilation*
