First Contact

Chapter 1

First Contact with the other civilisations that make up the Resistance was blocked in 2015 by Barack Obama

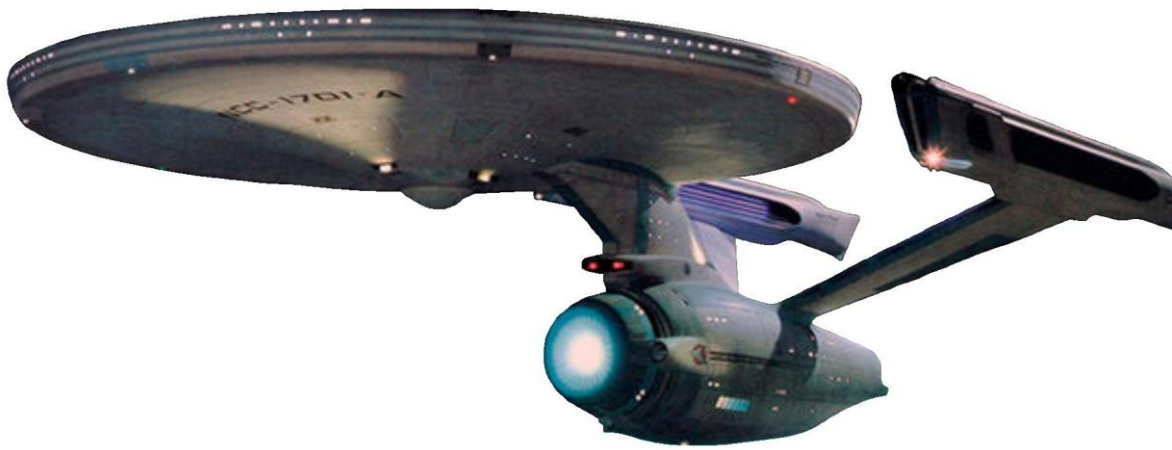

He blocked it by tipping off the Small Greys that First Contact was coming. He did this to safeguard his alliance with the Small Greys and to prevent himself being exposed. Barack Obama knew that if First Contact happened then he would be exposed as a collaborator, collaborating with the greatest enemy this world has ever known, and trying to take down Golden Age and the Resistance as part of that deal with the Small Greys.

First Contact should have happened in 2015. The first words spoken in a human language in First Contact would have been in Irish, because of me. First Contact should have happened in Ireland. Why? Because I am the greatest physicist in history and my designs for Warp Drive were validated by these civilisations. I know how to build it. This fulfilled the conditions for First Contact.

I am Zefram Cochrane. The greatest engineer in history.

The Federation

Chapter 1

Because of my role in the Resistance leading the war against the Borg, it is my task to set up the Federation

We didn't get our chance before. The collaborators saw to that.

But we will get our chance again.

Golden Age begins in Ireland. The Resistance is centred in Ireland.

It is the Irish who will set up the Federation.
