# Theresa May

## Chapter 1

*In Top Trumps, in a contest between the British Empire  
and an X-Man, this X-Man would win*

I got your message, Theresa. Now I have a message for you.

Golden Age will happen, regardless of your attempts to block it. Ireland will rise, regardless of your attempts to block. We're getting our language back. About time. And we're getting the north of our country back. For over eight hundred years the English have had a military presence in this country. No more. For over eight hundred years the English have laid claim to this country. No more.

A line has been crossed, Theresa, which gives me permission to act.

*Golden Age will go ahead. You cannot block it, Theresa.*

Part of that is that Britain must break apart. Golden Age is to do with Enlightenment. Respect for nations. There is no place for the notion of Empire, subjugation, world domination, the Master Race. There is no place in Golden Age for the concept of British. England can go Golden Age as England. Not as Britain.

So I am going to break apart your precious British Empire.

In addition it is time for our Celtic brethren, the Scots, to be freed. About fucking time. We'll be coming to the Welsh and the Cornish soon too.

Golden Age is about *Freedom*. There is no place in Golden Age for subjugation. England can go as English people. But not as the Master Race people. They can go as English. Not as British. It is time to leave your history of genocide and ethnic cleansing behind. Time to stop celebrating the annihilation of nations as a good thing. It is time to put such childish things behind.

Your latest assassination attempt on me crosses a line, Theresa. It frees me to act. Know that I am freeing the Scots. And the north of Ireland. A key to freeing the north of Ireland is to free the Scots. Free the Scots and we are half-way to freeing the north. I'll say here and now that Ireland will have the north back by 2024. And so it beings, Theresa. A clash of ideals. The *Right to be Free* versus the *Right to Conquest*. The *Right to Self-Determination* versus the *Right to Subjugation*.

And so it begins.

*In a Mirror, Darkly*
