## Chapter 1

*We survived for years by remaining hidden*

We fight in the Matrix. But we can mask our identities. Recently the Borg have come to know who we are. But only recently, when we revealed ourselves in order to drive through a Treaty which I'd been negotiating for years. Why would the Borg agree to this Treaty? Because of a Master Virus that I infected them with some time ago. If they violate the conditions of the Treaty then the Master Virus initiates severe penalties upon them. The Virus is coded right into the Borg main computer core. They cannot remove it without triggering it.

The Borg know who the Resistance are now. But it is too late.

We are now several months into the Implementation stage of the Treaty. When the conditions are met there can be contact between the rest of the Resistance and me. I cannot meet them before the conditions are met or it will violate the Treaty.

We are the Resistance.
